Alaska Energy Authority Program Fact Sheet: Training Program

Current Status:

The Alaska Energy Authority (AEA), along with the Denali Commission Training Fund, provides training opportunities to local residents for their energy projects and infrastructure. For FY 2010, the Denali Training Fund provided \$261,000 for the following: three Bulk Fuel Operator classes; two Power Plant Operator classes; one Advanced Power Plant Operator class; ten Bulk Fuel itinerant site visits. Completed to date: two Bulk Fuel Operator classes; one Power Plant Operator class; one Advanced Power Plant Operator class.

Program Description:

The intent of this training is to ensure that community personnel have the best skills with which to sustain their energy infrastructure in a business-like manner. With proper training, utilities can keep their facilities code-compliant and sustainable.

The training program currently offers the following courses:

- Bulk Fuel Operator Training
- Itinerant Bulk Fuel Operator Training
- Power Plant Operator Training
- Advanced Power Plant Operator Training
