

Critical Mass:

The NorthWind® 100 & the Yukon Delta in Alaska

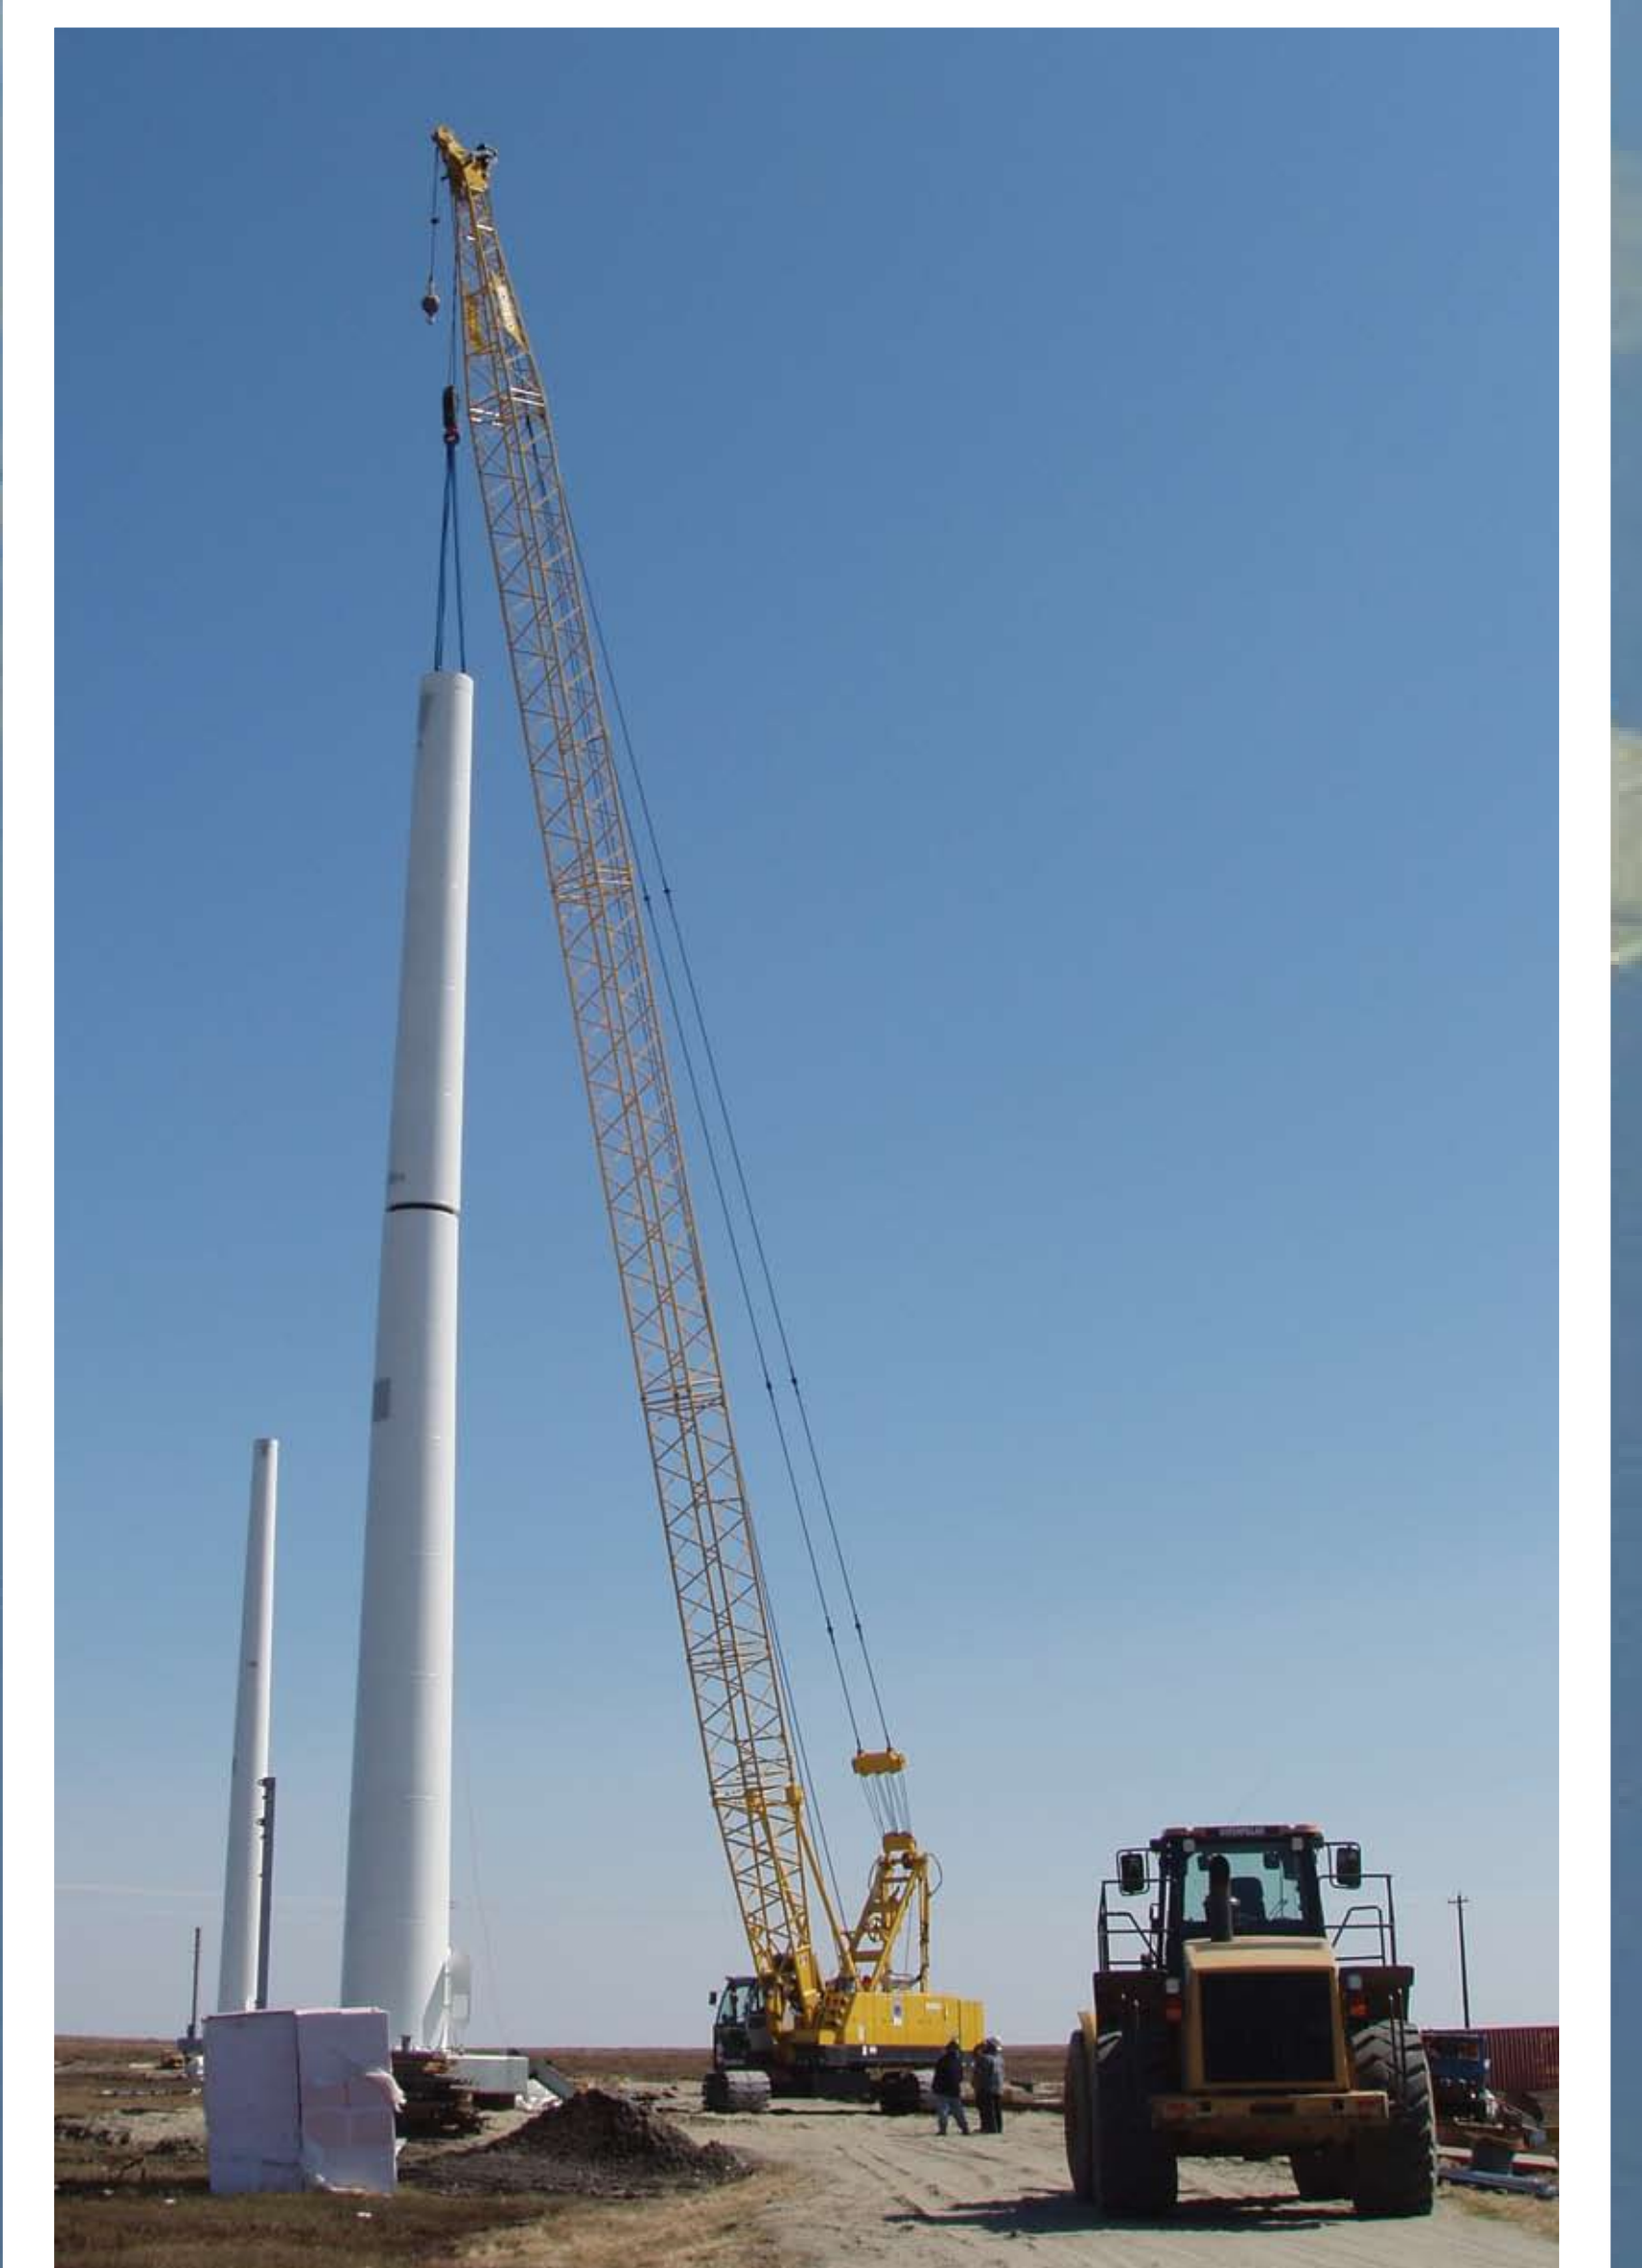

Extending today's resources...
creating tomorrow's choices

www.distributed-energy.com

Native Villages Using Wind for Electricity:

- 4 villages have installed NorthWind 100 wind turbines
- Medium penetration wind-diesel systems in use
- Many remaining villages are prime sites
- Diesel fuel savings average 22,000 gal/turbine/year
- Factory-certified technicians in local villages

Distributed Energy Systems would like to thank AVEC, Denali Commission, Coastal Villages Region Fund, STG, HDL, and Coffman Engineering.
